

Due to our increasing workload in the defence and automotive sectors, we are looking to recruit a senior SMT machine operator

The main duties include the responsibility for the following:

- Setup and operation of surface mount pick and place machines. Europlacer experience preferred, but not essential
- Setup and operation of automatic Speedprint and DEK stencil printers.
- Setup and operation of mass reflow ovens
- Perform manual component placement and inspection.
- Perform routine machine maintenance.
- Perform detailed quality inspection of populated circuit boards.

The ideal candidate for this role should have the following skills & qualifications:

- In depth knowledge of PCB assembly, both SMT and Conventional
- Minimum of five years' experience operating SMT Equipment in fast paced environment. Europlacer experience is a plus.
- Capable of working to IPC-610 Class 3 standards
- Interpret engineering drawings, BOMs and other customer data
- Computer literate with a good level of English
- Exceptional attention to detail
- Strong communication skills both oral and written
- Knowledge of AOI systems - Desirable
- Rework Skills – Desirable
- IPC-A-610 accreditation -Desirable
