

PFAS Statement

Holmes Circuit Designs Limited, known as HCD confirms that, to the best of our knowledge, none of the products supplied by our company knowingly contain per- and polyfluoroalkyl substances, commonly known as PFAS.

This statement applies to the printed circuit board assembly products and related assemblies supplied by HCD. Based on information currently available to us, and declarations received from our approved suppliers, we have no knowledge of any PFAS being intentionally added to, or knowingly present in, the products that we manufacture, assemble, or supply.

HCD relies on material declarations, supplier confirmations, and compliance information provided by our supply chain in order to assess the presence of restricted or declarable substances. Our suppliers have confirmed that, to the best of their knowledge, the materials, components, and substances supplied to us do not knowingly contain PFAS.

We do not intentionally add PFAS to our products during our manufacturing or assembly processes. Our processes are limited to printed circuit board assembly activities, including the placement and soldering of electronic components, inspection, testing, and related manufacturing operations.

This statement is provided in good faith and is based on the information available to HCD at the date of issue. It does not constitute a warranty or guarantee that products are completely free from trace levels of PFAS, as such substances may be present as impurities or at levels not identified by standard supply chain declarations or routine material disclosure processes.

HCD will continue to monitor applicable regulatory requirements and supplier information relating to PFAS and will review this statement as necessary.
